XA0470/00

WATERBASED V-JOINT SEALER XA0470/00

Protect your door and window frames with the brand new **XA0470/00**.

XA0470/00 is the new ready-to-use 1K waterbased clear v-joint sealer designed for door and window frames and for other wooden objects for outdoor use.

Thanks to its high elasticity resins the product ensures good penetration and minimal shrinkage, needed to provide excellent water repellency.

This new waterbased acrylic v-joint sealer comes in standard cartridge applicators making it very easy to use and clean. It is a versatile use product, meaning that it can be used both in translucent and solid colour coating processes, made possible by the superb transparency that the product maintains once dried.

Typical **APPLICATION PROCESS** consists of very few steps:

apply the basecoat for exterior then sand if needed;

apply **XA0470/00** and press it in the gaps by hand with a finger or with a spatula;

remove any excess of product;

apply the topcoat for exterior.

XA0470/00 is designed to fill even the smaller gaps in every wooden joinery.

The design of innovative products continues, looking for solutions that take good care of any wooden object, to ensure a greater durability over time.
